2025 NAB Show: CineCentral

https://www.tvtechnology.com/features/2025-nab-show-cinecentral-fuses-tools-and-technique

The 2025 NAB Show's CineCentral focuses on the interplay between tools and techniques in storytelling across media formats. It offers hands-on education through live demos, expert-led training, and interactive workshops, covering topics like scene blocking, emotional camera work, and technical skills essential for video production.

Tags: video production, storytelling, workshops, training, media formats

ACM Mile-High Video

https://www.mile-high.video/

ACM Mile-High Video conference in Denver covering video coding and streaming research with peer-reviewed talks and an engineer tutorial track (AV2/VVC/AV1).

ACM Mile-High Video 2025

https://www.mile-high.video/technical-program

The ACM Mile-High Video 2025 conference features a comprehensive technical program covering topics such as CDN-based video streaming, content-adaptive encoding, video enhancement, AI-generated content, and film grain technology. It includes presentations, panels, and discussions led by industry experts.

Tags: ACM, Mile-High Video, conference, video streaming, AI

ACM MMSys 2026

https://2026.acmmmsys.org/

Official site for the 17th ACM Multimedia Systems Conference with co-located NOSSDAV and MMVE workshops on streaming and networked video.

ACM MMSys 2026 — Call for Papers

https://2026.acmmmsys.org/call-for-papers

Multimedia Systems Conference CFP detailing research, open dataset, and open-source software tracks — the main academic venue for streaming systems work.

ACM NOSSDAV 2026 — Workshop on Network and OS Support for Digital A/V

https://nossdav.org/2026/

36th edition of the long-running ACM workshop on network/OS support for digital audio and video: immersive media delivery, ML for streaming, cloud-based coding.

AOSP and AAOS Meetup Archive

https://aospandaaos.github.io/meetup.html

A comprehensive archive of meetings focused on the Android Open Source Project (AOSP) and Android Automotive OS (AAOS). The archive includes slides and videos from various talks, providing valuable insights into Android development and related technologies.

Tags: AOSP, AAOS, Android development, technical talks, developer resources

Apple Developer Forums - Media Technologies

https://developer.apple.com/forums/topics/media-technologies/streaming

Apple's Developer Forums offer a dedicated section for Media Technologies, including streaming. Developers can engage in discussions about HTTP Live Streaming (HLS), AVFoundation, and other Apple media technologies, making it a crucial resource for those developing on Apple platforms.

Tags: Apple, developer forum, media technology, HLS, AVFoundation

Atlanta Tech Resources

https://github.com/citizen00147/atlanta-tech-resources

A curated collection of groups, events, and opportunities for developers in the Atlanta, GA area. This repository serves as a

comprehensive guide to active tech meetups, affordable conventions, and networking opportunities, making it easier for developers to connect and collaborate.

Tags: developer meetups, Atlanta, tech events, networking, community resources

Awesome Tech Communities

https://github.com/MartinRosenberg/Awesome-Tech-Communities

A curated list of tech communities across various regions, including those focused on video technology. This resource helps developers find and connect with local and global tech groups, fostering collaboration and knowledge sharing.

Tags: tech communities, developer meetups, networking, collaboration, resources

Bay Area Tech Meetups

https://github.com/elizabethsiegle/Bay_Area_tech_meetups

A comprehensive list of tech meetups in the San Francisco Bay Area, covering topics like mobile development, iOS, AI, and more. It provides details on meetup topics, locations, and schedules, aiding developers in finding relevant community events.

Tags: Bay Area, tech meetups, developer community, networking, event listings

Bitmovin Community Site

https://bitmovin.com/blog/video-technology-developers/

Bitmovin's community site offers a wealth of public projects, open and solved questions, forums, and hundreds of resources for video technology developers. It's an excellent location to exchange information with peers and share opinions about Bitmovin's products and video streaming technologies.

Tags: video technology, developer community, forum, resources, Bitmovin

BOS Video Technology Meetup

https://www.meetup.com/bos-video-technology/

The BOS Video Technology meetup in Boston is for individuals interested in the technology behind video playback, storage, and delivery. Topics include HTML5 video, streaming, transcoding, codecs, advertising, open standards, and CDNs. The group focuses on the engineering aspects of video technology.

Tags: video technology, streaming, transcoding, codec, engineering

Brightcove Global Streaming Technology Summit 2023

https://webinar.brightcovegallery.com/bcovkorea2023-en

The Brightcove Global Streaming Technology Summit 2023, held on December 14, 2023, focused on how media companies in South Korea can expand their global footprint using the latest streaming technologies. The event featured discussions on the global FAST market, choosing the right streaming solutions, and the importance of streaming technology for global success.

Tags: streaming technology, global expansion, FAST market, media companies, video streaming

Canon Video Forums

https://community.usa.canon.com/t5/Video/ct-p/videosolutions

The Canon Video Forums provide a platform for discussions related to Canon's video products, including camcorders, professional video equipment, and video accessories. Users can seek advice, share experiences, and discuss technical aspects, making it a valuable community for developers and professionals working with Canon's video technology.

Tags: video technology, Canon, developer forum, video equipment, video accessories

CNCF Community Groups

https://github.com/cncf/communitygroups

Managed by the Cloud Native Computing Foundation, this repository organizes community groups (formerly meetups) focused on cloud-native technologies. It offers resources for organizing and participating in community events, including training sessions and support for event management.

Tags: CNCF, cloud-native, community groups, meetups, developer resources

Codec Developers - Google Groups

https://groups.google.com/a/webmproject.org/g/codec-devel

The Codec Developers Google Group is a mailing list for discussions related to codec development, including topics on libvpx and AV1. It's a platform for developers to share information, ask questions, and collaborate on codec-related projects.

Tags: codec development, libvpx, AV1, developer forum, video encoding

CommCon

https://commcon.xyz/

Open-source real-time communications community conference covering FreeSWITCH, Asterisk, Janus, Jitsi, Kamailio, and WebRTC stack.

compress.cafe — Encoding Community Resources

https://compress.cafe/
Curated index of active video-encoding Discord communities and practitioner guides from the SVT-AV1-PSY / HDR encoding scene.

ConferenceXP

https://github.com/conferencexp/conferencexp
ConferenceXP is an open-source video conferencing and collaboration platform developed by Microsoft Research. It supports low-latency, high-fidelity conferencing applications and is optimized for multicast networks, making it suitable for academic, government, and research networks.

Tags: video conferencing, collaboration, open-source, Microsoft Research, multicast

Creative COW

https://creativecow.net/
Creative COW is a website of support communities for digital video, video editing, and media production professionals in broadcasting, motion graphics, visual effects, and film. It provides over 60 online support discussion forums spanning a wide range of professional video tools and software, along with over 1,000 free text and video tutorials, podcasts, and other resources for video professionals.

Tags: video editing, media production, broadcasting, motion graphics, visual effects

Demuxed 2017

https://www.youtube.com/watch?v=PSdhW-R9u6s&list=PLkyaYNWEKcOfntbMd6KtHhF7qpL9hj6of
2017 Demuxed talks & presentations

Tags: conference, video technology, presentations, talks

Demuxed 2018

https://www.youtube.com/watch?v=bfK_f7GBA8s&list=PLkyaYNWEKcOfARqEht42i1P4kBemzEV2V
2018 Demuxed talks & presentations

Tags: conference, video technology, talks, presentations

Demuxed 2019

https://m.youtube.com/playlist?list=PLkyaYNWEKcOf_C_6W45abNvXMb40xUUqh
2019 Demuxed talks & presentations

Tags: conference, video technology, talks, presentations

Demuxed 2021

https://www.youtube.com/playlist?list=PLkyaYNWEKcOfD1GYFxFbZXDP03XM-cZPg
2021 Demuxed talks & presentations

Tags: conference, talks, video technology, presentations

Demuxed 2022

https://www.youtube.com/playlist?list=PLkyaYNWEKcOf98lZxnCcL6y7ZIVU3oSYO
2022 Demuxed talks & presentations

Tags: conference, video, talks, technology, streaming

Demuxed 2024

https://2024.demuxed.com/
Demuxed is a conference for video engineers focusing on video technology, encompassing topics from encoding to delivery and playback. Originating from the SF Video Technology meetup, it aims to create a community for engineers building the technology powering video. The event features discussions on various aspects of video engineering and is organized by a community-led group with support from Mux.

Tags: video engineering, conference, encoding, delivery, playback

Demuxed 2025 (London) — Schedule

https://2025.demuxed.com/live
Official site for the 11th Demuxed, the first held outside the US, with the full two-day video-engineering talk schedule.

Demuxed 2025 Lightning Talks

https://www.youtube.com/watch?v=6bgPl4DFzzg
Demuxed 2025 lightning-talk block including Clément Cordier's Pikimov web video engineering talk.

Demuxed 2025 — program and talk archive

https://2025.demuxed.com/

Demuxed 2025 conference site with the full talk lineup and abstracts, covering Chromium native HLS, BFI FFV1/Matroska archival workflows, CMSD-based failure detection, and media-first CDN caching.

Demuxed Conference

https://www.demuxed.com/about
Engineer-run video-tech conference feeding the video-dev Slack community and city meetups.

Demuxed Meetups Directory

https://www.demuxed.com/meetups
Live directory of independently-run video-tech meetups worldwide (SF Video Tech, Paris Video Tech, Stockholm, Portland, etc).

Demuxed Podcast

https://www.demuxed.com/
Podcast for video engineers run by Heavybit, 22+ episodes covering DASH, HLS, RTMP, hls.js, Shaka Player, and low-latency streaming with guests from Bitmovin, Vimeo, VideoLAN, and Livepeer.

Demuxed — Global video engineering meetups index

https://2017.demuxed.com/meetups/
Index of video-engineering meetups worldwide affiliated with Demuxed, spanning SF, London, NYC and other cities.

Denver Video Technology Meetup

https://www.meetup.com/Denver-Digital-Video/
The Denver Video Technology meetup is for individuals interested in the technology behind video and video publishing, focusing on software development. Topics include video streaming, transcoding, codecs, and open standards, emphasizing the software aspects of video technology.

Tags: video technology, streaming, transcoding, codec, software development

Digital Video Forum – The Digital FAQ

https://www.digitalfaq.com/forum/video/
The Digital Video Forum on The Digital FAQ website offers discussions on DVD and Blu-ray creation, video hardware repair, videography, and blank media. It includes sub-forums for project planning, workflows, capturing, editing, encoding, and authoring, providing a comprehensive resource for developers and professionals in video streaming and encoding.

Tags: video streaming, video encoding, video hardware, developer forum, video technology

Digital Video Information Network (DVinfo.net)

https://www.dvinfo.net/
DVinfo.net is a platform offering forums and resources focused on digital video technology, including discussions on video cameras, editing software, and production techniques. It's a valuable resource for developers seeking information on video streaming and encoding technologies.

Tags: digital video, video technology, forum, resources, community

Digital Video Talk Forum

https://www.dpreview.com/forums/1045
Hosted by Digital Photography Review, this forum is dedicated to discussions on digital video capture and processing, encompassing topics from digital still cameras to camcorders. It's a valuable resource for sharing knowledge and troubleshooting video-related issues.

Tags: digital video, video processing, camcorders, video capture, community forum

Digital Video Talk Forum on DPReview

https://www.dpreview.com/forums/1009
The Digital Video Talk Forum on DPReview is a community where videographers and video editors discuss topics related to videography, video editing, and equipment. It's a valuable platform for sharing knowledge and seeking advice on video production.

Tags: videography, video editing, forum, video production, community

Doom9 — Encoder tuning: 2nd generation guide to aomenc-av1

https://forum.doom9.org/showthread.php?t=183906
Canonical long-form community thread on tuning aomenc AV1 parameters, with detailed test results and rationale for each setting.

Doom9's Forum

https://forum.doom9.org/
Doom9's Forum is a longstanding community dedicated to digital audio and video manipulation. It hosts discussions on

various video encoding tools and codecs, including x264, AviSynth, and MeGUI. The forum is frequented by developers and enthusiasts, making it a rich resource for technical insights and support.

Tags: video encoding, x264, AviSynth, MeGUI, developer forum

Doom9's Forum - Video Encoding Section

https://forum.doom9.org/forumdisplay.php?f=17

An online forum dedicated to discussions on digital audio and video manipulation, including video encoding. It serves as a hub for major video encoding tools and technologies, offering a wealth of information and community support.

Tags: video encoding, forum, digital video, codec, streaming

DV Info Net Forums

https://www.dvinfo.net/forum/

DV Info Net Forums is a community dedicated to digital video production, covering topics such as camera systems, editing software, and production techniques. It provides a platform for professionals and enthusiasts to share knowledge, ask questions, and discuss the latest developments in video technology.

Tags: digital video, production, camera systems, editing software, video technology

DVXuser Forums

https://www.dvxuser.com/

DVXuser is a forum community focused on digital video production, covering topics from camera equipment to editing software. It's a valuable resource for developers interested in video streaming and encoding, offering discussions and insights from industry professionals.

Tags: digital video production, camera equipment, editing software, forum, industry professionals

EBU Production Technology Seminar 2026

https://tech.ebu.ch/events/pts2026

EBU's annual Geneva seminar on broadcast/streaming production tech: software-defined studios, Dynamic Media Facility, MXL, cloud sovereignty; slides and recordings published.

encode.moe Encoding Guide

https://guide.encode.moe/encoding/preparation.html

Community-maintained deep encoding guide (VapourSynth, x264/x265/aom, audio codecs) from the anime fansubbing/encoding community.

FFmpeg IRC channels (#ffmpeg, #ffmpeg-devel on Libera.Chat)

https://ffmpeg.org/contact.html

Official FFmpeg real-time community channels: #ffmpeg for user support, #ffmpeg-devel for development discussion, logged and active.

FFmpeg Mailing Lists & IRC (Official)

https://ffmpeg.org/mailing-list-faq.html

Official FFmpeg community channels: ffmpeg-devel (patch review), ffmpeg-user (help), libav-user mailing lists, plus IRC channel info.

FOMS 2024 session notes — Common Media Library

https://foms-workshop.org/foms2024/Notes/CommonMediaLibrary.html

Verbatim developer session notes from FOMS 2024 on the Common Media Library effort: shared CMCD/CMSD, ID3, and CEA-608 caption handling code across hls.js and dash.js.

FOMS 2025 — Foundations of Open Media Software workshop

https://www.foms-workshop.org/foms2025/

Official page for the FOMS developer un-conference, where open media software maintainers (hls.js, dash.js, FFmpeg, GPAC, codec devs) meet; output is published participant session notes rather than proceedings.

FOSDEM 2026 Open Media Devroom Schedule

https://fosdem.org/2026/schedule/track/open-media-devroom/

Full talk schedule for FOSDEM's open media track covering codecs, FFmpeg/GStreamer, and open streaming stacks, with recordings released after the event.

FOSDEM 2026: Decentralized Public Broadcast with Streamplace

https://fosdem.org/2026/schedule/event/PN7WCS-decentralized_public_broadcast_with_streamplace/

FOSDEM open-media devroom talk on Streamplace, a decentralized public-broadcast streaming project/standard.

Future of Video: Business of Streaming

https://www.parksassociates.com/event/future-of-video
Scheduled for November 18-20, 2025, in Marina del Rey, California, this conference covers key topics in connected entertainment and video services. It includes an interactive research workshop on consumer viewing habits and offers multiple sponsorship opportunities for brand promotion within the streaming video industry.

Tags: streaming video, business, entertainment, conference, networking

GITEX Asia 2025

https://gitexasia.com/
GITEX Asia 2025 is a technology conference and exhibition tailored to the Asian market, bringing together businesses, governments, and innovators to explore new technologies influencing the digital world. The event features over 500 speakers addressing topics such as AI, machine learning, 5G, and smart cities.

Tags: technology conference, AI, machine learning, 5G, smart cities

Google Cloud Next 2025

https://www.itpro.com/cloud/live/google-cloud-next-2025-all-the-news-and-updates-live
A conference highlighting Google's advancements in cloud computing and AI, with sessions relevant to video technology developers. The 2025 event introduced new AI tools and infrastructure improvements beneficial for video streaming and encoding applications.

Tags: Google Cloud, AI, cloud computing, video technology, developer conference

GStreamer Discourse Forum

https://discourse.gstreamer.org/
Official GStreamer community forum where developers discuss pipeline construction, plugin APIs, hardware decode and latency tuning.

Hybrid Meetup Platform

https://github.com/montevideo-tech/hybrid-meetup-platform
An open-source project designed to host and run hybrid meetups for the video community. Built by video developers for video developers, it leverages WebRTC technology to facilitate seamless virtual and in-person interactions.

Tags: WebRTC, hybrid meetups, video technology, open-source, developer tool

IEEE ICIP AOMedia Industry Workshop

https://2025.ieeeicip.org/aomedia-industry-workshop
Codec/compression research workshop affiliated with AOMedia, covering AV1/AV2 and machine learning for video coding.

InfoComm 2025

https://www.infocommshow.org/infocomm-2025
InfoComm 2025 is a premier event for audiovisual professionals, featuring a wide range of sessions and exhibits on topics such as automated conference and collaboration solutions, integrating pro video and audio management solutions, and optimizing Zoom Room deployments with Logitech hardware. The event provides opportunities for hands-on education, networking, and exploring the latest innovations in the AV industry.

Tags: audiovisual, conference, collaboration, AV industry, technology

ISE Broadcast AV Summit

https://iseurope.org/content-programme/broadcast-av-summit
Professional AV, broadcast, and media tech convergence summit held in Barcelona as part of ISE.

Kaltura Community Forums

https://forum.kaltura.org/c/community-forums/21
The Kaltura Community Forums provide a platform for developers and users to discuss various aspects of Kaltura's video technology, including APIs, SDKs, and server management. It's a valuable resource for troubleshooting, sharing best practices, and staying updated on Kaltura's offerings.

Tags: Kaltura, video technology, developer support, API, SDK

Kodi Community Forum

https://forum.kodi.tv/
Large community forum covering playback engineering topics: video renderers, hardware decode paths, refresh-rate switching and audio passthrough on media devices.

Level1Techs Forums - Encoding/Compression Video and Audio Mega Thread

https://forum.level1techs.com/t/encoding-compression-video-and-audio-mega-thread/210653
This mega thread on the Level1Techs Forums is dedicated to discussions about video and audio encoding/compression. It covers various topics, including tools, techniques, and best practices, serving as a valuable resource for developers interested

in video streaming and encoding technologies.

Tags: video encoding, audio encoding, compression, developer resources, best practices

Lex Fridman Podcast #496 — FFmpeg/VLC Engineers

https://lexfridman.com/ffmpeg-transcript/

Deep-dive podcast interview with FFmpeg and VLC engineers covering codec and streaming internals.

Los Angeles Video Technology

https://www.meetup.com/los-angeles-video-technology/

A Los Angeles-based meetup for those interested in the technology behind video and video publishing, covering topics like HTML5 video, streaming, transcoding, codecs, advertising, open standards, virtual reality, 360-degree video, and HDR. The group focuses on the engineering side, offering a platform for developers to exchange ideas and knowledge.

Tags: video technology, streaming, transcoding, codec, virtual reality

MacRumors Forums - Digital Video Section

https://forums.macrumors.com/forums/digital-video.80/

The MacRumors Forums host a dedicated section for digital video discussions, where users share tips, resources, and experiences related to video technology, including forums for learning about video technologies and recommended forums for digital video.

Tags: digital video, forum, video technology, community, Mac

Microsoft Build 2025

https://build.microsoft.com/

An annual conference by Microsoft aimed at software engineers and web developers, covering topics including video technology. The 2025 event offers sessions on Windows, Azure, and other Microsoft technologies pertinent to video streaming and encoding.

Tags: Microsoft Build, developer conference, video technology, Azure, software development

MonteVIDEO Tech Meetup

https://montevideotech.dev/

A community of engineers, developers, and enthusiasts passionate about video technology. The meetup offers events like 'Mate Talks' and 'Summer Camp,' focusing on collaboration, knowledge sharing, and cultural exchange within the video tech community. Topics include video engineering, product design, and development.

Tags: video engineering, product design, development, collaboration, knowledge sharing

Montevideo Video Tech Summer Camp

https://www.qualabs.com/community

An annual event organized by Qualabs, bringing together video technology professionals for discussions on industry trends, technical challenges, and cultural experiences. The event offers opportunities to learn from experts, share ideas, and build a strong community among video developers.

Tags: video technology, summer camp, Qualabs, networking, industry trends

Movie Studio Zen Forum - Technology Forums

https://www.moviestudiozen.com/forum/technology-forums

The Technology Forums on Movie Studio Zen provide discussions about computer hardware and electronic equipment used in video production, such as graphics cards, CPUs, cameras, and microphones. It's a community-driven platform for sharing knowledge and troubleshooting video technology-related issues.

Tags: video production, hardware, forum, community, technology

NAB Show 2025

https://www.tvtechnology.com/features/welcome-to-the-2025-nab-show-where-the-future-is-now

The NAB Show 2025, themed 'Welcome to the Future,' is a pivotal event in the media and entertainment industry, showcasing the integration of advanced technologies like AI and cloud computing. It features over 500 speakers and exhibits emphasizing trends such as artificial intelligence, cloud virtualization, the creator economy, sports, and streaming. Highlights include a Sports Summit, hands-on activities with tech giants, and insights into emerging streaming monetization models.

Tags: NAB Show, media technology, AI, cloud computing, streaming

OBS Forums

https://obsproject.com/forum/

The OBS Forums are dedicated to discussions around Open Broadcaster Software (OBS), a popular open-source software for video recording and live streaming. The forums include topics on video encoding, hardware compatibility, and troubleshooting, providing a collaborative space for developers and users to share knowledge and solutions.

Tags: OBS, video recording, live streaming, video encoding, open-source software

OTT.X Webinars

https://ottx.org/webinars/

Ongoing free webinar series on OTT/CTV/digital media research and strategy.

P2P Audiovisual Resource Pages and Links

https://wiki.p2pfoundation.net/P2P_Audiovisual_Resource_Pages_and_Links

A comprehensive collection of software and resources for audio and video players, aggregators, web TV, codecs, editing tools, and 3D applications. This resource is valuable for developers seeking tools and information on video streaming and encoding technologies.

Tags: video technology, resources, P2P, audiovisual, software

Paris Video Tech

https://www.parisvideotech.com/

Quarterly video technology meetup in Paris covering players, encoding, packaging and analytics, with recorded talks and slides published per event.

Picture Coding Symposium — Complete Paper Index (dblp)

https://dblp.org/db/conf/pcs/index.html

Paywall-free per-edition index of all Picture Coding Symposium papers, the longest-running conference dedicated to image and video coding.

Proceedings of ACM MMSys 2026

https://dl.acm.org/doi/proceedings/10.1145/3793853

ACM Multimedia Systems Conference 2026 proceedings including the open datasets and software track relevant to streaming systems research.

Proceedings of the 4th ACM Mile-High Video Conference (MHV '25)

https://dl.acm.org/doi/proceedings/10.1145/3715675

Full ACM proceedings of Mile-High Video 2025, the leading industry-plus-academia venue for streaming papers spanning production, encoding, packaging, delivery and playback.

Proceedings of the 5th ACM Mile-High Video Conference (2026)

https://dl.acm.org/doi/proceedings/10.1145/3789239

Full open-access proceedings of MHV 2026 with 50+ peer-reviewed papers on video delivery, encoding, packaging and player engineering.

r/AV1 Subreddit

https://www.reddit.com/r/AV1/

Active community for AV1 codec news, encoder benchmarks, and settings discussion.

Reddit r/videostreaming

https://www.reddit.com/r/videostreaming/

A subreddit dedicated to video streaming technology. Community members share knowledge, ask questions, and discuss streaming protocols, encoding settings, and tools.

Tags: community, forum, discussion, streaming, technology

Resource Pages and Links to the P2P Audiovisual Net

https://wiki.p2pfoundation.net/Resource_Pages_and_Links_to_the_P2P_Audiovisual_Net

An extensive list of tools and resources related to online media, remix culture, and technologies like DRM, P2P, and RSS TV. This resource is beneficial for developers interested in the broader context of video streaming and encoding within the P2P framework.

Tags: P2P, audiovisual, resources, online media, technology

RIST Forum Events

https://www.rist.tv/events

The RIST Forum hosts various events showcasing and demonstrating RIST interoperability and benefits. These events include webinars, conferences, and exhibitions focused on the Reliable Internet Stream Transport (RIST) protocol, which is essential for secure and reliable transportation of live video over unmanaged networks.

Tags: RIST Forum, video streaming, RIST protocol, live video, networking

RTC.ON Conference

https://rtcon.swmansion.com/

Real-time multimedia engineering conference covering WebRTC at scale, MoQ in production, and edge AI media (Kraków).

SEGMENTS:2023 by Streaming Video Technology Alliance

https://web.archive.org/web/20230521170721/https://www.businesswire.com/news/home/20230516005279/en/Streaming-Video-Technology-Alliance-Introduces-New-Industry-Conference-SEGMENTS2023

SEGMENTS:2023, introduced by the Streaming Video Technology Alliance, was a one-day public conference held on May 16, 2023, in New Orleans. The event provided a comprehensive walkthrough of the streaming video workflow, covering topics from content ingestion to analytics, and featured speakers from over 25 companies discussing challenges and best practices in operating streaming services.

Tags: streaming video, conference, video workflow, analytics, best practices

SF Video Technology Meetup

https://www.meetup.com/sf-video-technology/

The SF Video Technology meetup in San Francisco caters to those interested in the technology behind video and video publishing. Discussions cover HTML5 video, streaming, transcoding, codecs, advertising, and open standards, with a focus on engineering rather than creative aspects.

Tags: video technology, streaming, transcoding, codec, engineering

SIGGRAPH 2025

https://www.siggraph.org/

SIGGRAPH 2025 is an annual conference on computer graphics and interactive techniques, featuring presentations on the latest research, technologies, and applications in the field. It includes a trade show, educational courses, and panel discussions relevant to video technology professionals.

Tags: computer graphics, interactive techniques, video technology, conference, trade show

Silicon Valley Video Summit 2025

https://svgplay.sportsvideo.org/silicon-valley-video-summit-2025

The Silicon Valley Video Summit 2025 is an annual exchange of enterprise media know-how, focusing on how video is transforming enterprise communication. The event features sessions on topics like live television production, AI in media creation, virtual production, and immersive experiences. It brings together corporate video producers, technologists, and industry leaders to discuss the latest trends and technologies in video production.

Tags: video summit, enterprise media, AI, virtual production, immersive experiences

SMPTE Events

https://www.smpte.org/events

The Society of Motion Picture and Television Engineers (SMPTE) offers a range of events including webcasts, courses, and conferences focused on media and entertainment technology. These events cover topics like high dynamic range, imaging system fundamentals, and the latest industry standards.

Tags: SMPTE, media technology, courses, conference, standard

SMPTE Media Technology Summit 2026

https://summit.smpte.org/2026

SMPTE's annual technical summit (Nov 2026, Pasadena) covering color science, compression, and media infrastructure, with papers feeding the SMPTE Motion Imaging Journal.

Streaming Media Conferences

https://www.streamingmedia.com/conferences/

Streaming Media organizes multiple conferences and exhibitions annually, serving as the industry's meeting place for streaming media professionals. These events cover a wide range of topics, including audio and video on the Internet, content delivery, and emerging technologies in streaming media.

Tags: streaming media, streaming conferences, online video, content delivery, media technology

Streaming Media Connect 2023

https://www.streamingmediaglobal.com/Articles/ReadArticle.aspx?ArticleID=161593

Streaming Media Connect 2023 was a virtual conference held from November 13 to 16, 2023, featuring industry experts discussing topics such as cloud workflows, live streaming optimization, and codec developments. The event provided valuable insights into the latest trends and technologies in the streaming media industry.

Tags: streaming media, virtual conference, video technology, live streaming, cloud workflows

Streaming Media Connect 2025

https://www.streamingmedia.com/Conferences/Connect2025-May/Default.aspx

Streaming Media Connect is a free virtual event series offering practical advice and insights from industry leaders on live streaming, OTT, content delivery, and monetization. The next installment is scheduled for May 20-22, 2025.

Tags: streaming, OTT, content delivery, monetization, virtual event

Streaming Media Connect February 2025

https://www.streamingmedia.com/conferences/connect2025/default.aspx

A free virtual event from February 25-27, 2025, offering practical advice, thought leadership, and insights from industry leaders. Topics include live streaming, OTT, content delivery, and monetization strategies. The event features live Q&A sessions, expert debates, and exclusive insights to help build stronger streaming solutions.

Tags: streaming media, virtual event, live streaming, OTT, content delivery

Streaming Media University Workshops

https://www.streamingmedia.com/Conferences/StreamingMediaUniversity/Schedule.aspx

Streaming Media University offers a series of workshops designed to educate professionals on the latest tools and techniques in the streaming industry. These workshops cover a range of topics, including production gear, software solutions, and best practices for delivering high-quality streaming content. They provide hands-on experience and insights from industry experts, making them valuable for developers and technologists in the video streaming field.

Tags: streaming media, workshops, education, video production, best practices

Streaming Tech Sweden

https://streamingtech.se/index.html

Vendor-independent single-day streaming tech conference by Eyevinn Technology covering OTT, live streaming, DRM, ad tech, cloud broadcast infra (Stockholm).

Streaming Video Industry Events Calendar

https://www.svta.org/streaming-video-industry-events/

The Streaming Video Technology Alliance provides a comprehensive calendar of streaming video industry events, including conferences, meetups, and more. This resource helps professionals stay informed about upcoming events related to online video, networking opportunities, and industry trends.

Tags: Streaming Video Technology Alliance, streaming events, video industry, networking, online video

Streaming Video Technology Alliance (SVTA) Events

https://www.svta.org/svta-calendar/

The SVTA organizes meetings, webinars, and events focused on improving streaming video technologies. Their calendar includes various sessions on topics like Common Media Library Roadmap and dash.js, providing valuable resources for professionals in the streaming industry.

Tags: streaming video, technology, webinars, meetings, SVTA

Streaming Video Technology Alliance (SVTA) Special Events

https://www.svta.org/svta-special-events/

SVTA organizes special events such as networking parties and workshops during member meetings, focusing on streaming video technologies. These events provide opportunities for professionals to network, learn about new technologies, and discuss industry challenges.

Streaming+ at NATPE Global 2025

https://global.natpe.com/2025/streamingplus/

Streaming+ is a dedicated conference strand at NATPE Global 2025 that delves into pressing issues and challenges surrounding the OTT business, content, and consumer experience. The event features keynotes, panel discussions, and networking opportunities with thought leaders and changemakers transforming the streaming industry.

Tags: Streaming+, NATPE Global, OTT, content, consumer experience

SVT-AV1 (GitLab)

https://gitlab.com/AOMediaCodec/SVT-AV1

Official GitLab repository for SVT-AV1, the Scalable Video Technology AV1 encoder and decoder maintained under the Alliance for Open Media. Hosts the source code, releases, issue tracker and build documentation.

SVTA STREAMups

https://www.svta.org/streaming-video-alliance-streamups-and-meetups/

Streaming Video Technology Alliance (SVTA) organizes STREAMups, which are industry meetups bringing together professionals to discuss critical technical challenges in video streaming. These events foster collaboration and innovation within the video technology community.

Tags: video streaming, industry meetups, technical challenges, collaboration, innovation

SVTA Webinars (SVTA University)

https://university.svta.org/svta-webinars/
Streaming Video Technology Alliance's recurring monthly webinar series featuring member-company experts on streaming security, CDN, and playback best practices.

Tech Community Slacks (curated list)

https://github.com/thisdot/tech-community-slacks
Curated repo listing active tech community Slack workspaces, including video/streaming engineering communities.

Tech Meetups

https://github.com/thisdot/tech-meetups
A curated list of various tech meetups covering a wide range of topics, including video technology. This resource helps developers find and participate in relevant community events to enhance their skills and network.

Tags: tech meetups, developer community, networking, video technology, resources

The Video Consortium Gatherings and Workshops

https://videoconsortium.org/events
The Video Consortium hosts industry screenings, happy hours, and professional development workshops for filmmakers. These gatherings are designed to foster community, provide learning opportunities, and support filmmakers in their professional growth.

Tags: Video Consortium, filmmakers, workshops, networking, professional development

The Video Insiders Podcast

https://thevideoinsiders.simplecast.com/
Beamr's ongoing podcast hosted by Mark Donnigan and Dror Gill covering codecs, encoding, transcoding, and streaming industry trends, with guests like Jan Ozer and Guido Meardi.

The Video Insiders — codec/encoding podcast

https://podcasts.apple.com/us/podcast/the-video-insiders/id1444571837
Podcast on video codecs, encoding and compression featuring industry experts (Jan Ozer et al.), covering codec futures and WebRTC.

Twitch Developer Forums

https://discuss.dev.twitch.com/
The Twitch Developer Forums provide a platform for developers to discuss and collaborate on Twitch's API, Extensions, and other developer products. It includes categories for announcements, API discussions, and game development integrations, serving as a central hub for developers building on the Twitch platform.

Tags: Twitch, API, developer forum, game development, extensions

TwitchCon

https://www.twitchcon.com/
TwitchCon is a semi-annual convention organized by Twitch Interactive, focusing on the culture of livestreaming, entertainment, esports, and internet culture. It provides opportunities for industry professionals, streamers, and fans to meet, discover new products, and trial upcoming games.

Tags: TwitchCon, live streaming, convention, esports, internet culture

TwitchCon 2025

https://en.wikipedia.org/wiki/TwitchCon
TwitchCon is a semi-annual convention organized by Twitch Interactive, focusing on livestreaming, entertainment, esports, and internet culture. The 2025 events are scheduled for May 31 - June 1 in Rotterdam and October 17-19 in San Diego, marking the 10th anniversary of TwitchCon. The convention allows community members to meet streamers, discover new products, and trial upcoming games.

Tags: TwitchCon, live streaming, esports, internet culture, community

VidCon

https://vidcon.com
VidCon is an annual convention for influencers, fans, executives, and online brands, primarily featuring prominent video stars from across the internet. Founded by veteran YouTube creators John and Hank Green, VidCon has expanded internationally

with events in Singapore, Abu Dhabi, Mexico City, Australia, and São Paulo. The convention includes panels, workshops, and meet-and-greets, focusing on online video content creation and community building.

Tags: online video, content creation, influencers, convention, community

VidCon 2025

https://en.wikipedia.org/wiki/VidCon

VidCon is an annual convention for influencers, fans, executives, and online brands, featuring prominent video stars from across the internet. The 2025 event is scheduled for June 19–21 at the Anaheim Convention Center in California, offering a platform for networking and learning about online video trends.

Tags: online video, influencers, networking, conference, entertainment

Video Dev — video engineers community hub

https://www.video-dev.org/

Community hub for video engineers with an open-source focus, gateway to the video-dev Slack and events like Demuxed.

Video Services Forum (VSF)

https://en.wikipedia.org/wiki/Video_Services_Forum

Industry association for media transport/interop standards, runs VidTrans conference and interoperability testing programs.

Video Tech NYC

https://www.meetup.com/video-tech-nyc/

A meetup group in New York City for individuals interested in the technology behind video and online video publishing, covering topics like HTML5 video, streaming, transcoding, codecs, advertising, open standards, video testing pipelines, VR/360, and analytics. The focus is on the engineering aspects, though creatives are also welcome.

Tags: video technology, streaming, transcoding, codec, analytics

video-dev Slack Community

https://university.svta.org/industry-resource/video-dev-slack/

Slack community for streaming/video engineers covering HLS, DASH, players, and encoding, listed via SVTA University.

Videography

https://www.reddit.com/r/Videography/

r/Videography is a subreddit dedicated to videography discussions, where members share insights, ask questions, and provide feedback on video projects. It's a dynamic community suitable for developers interested in video streaming and encoding tools, offering real-world experiences and advice.

Tags: videography, video production, community, forum, discussion

VideoHelp Forum

https://forum.videohelp.com/

The VideoHelp Forum is a comprehensive platform covering a wide range of topics related to video technology, including video conversion, editing, authoring, and capturing. It serves as a valuable resource for developers and enthusiasts seeking advice, tutorials, and discussions on various video-related tools and techniques.

Tags: video conversion, video editing, authoring, capturing, developer forum

Videomaker Community

https://www.videomaker.com/l/connect/

Videomaker's community offers forums and resources for videographers of all skill levels. It provides discussions on video production techniques, equipment reviews, and post-production tips, serving as a valuable platform for learning and networking.

Tags: videography, video production, equipment reviews, post-production, networking

VideoTech 2023 Conference

https://vtconf.com/en/archive/2023/

VideoTech 2023 was a conference on video technologies held online from November 16–17 and in Moscow from November 20–21, 2023. The event featured a diverse lineup of speakers from companies like VK, Yandex, and Huawei, covering topics related to video technology advancements and industry trends.

Tags: video technology, conference, industry trends, VK, Yandex

VideoTech 2025

https://vtconf.com/en/

A conference for video technology enthusiasts scheduled for September 2025 in Moscow and online. It covers topics from video production to distribution, including encoding, decoding, delivery, and the application of ML and AI in video technologies. The event aims to develop a professional community of engineers in the field.

Tags: video technology, conference, ML, AI, video production

VidTrans (Video Services Forum)

https://vsf.tv/events

Annual Video Services Forum conference on video/audio transport interoperability, hosted in NYC.

VidTrans 2026 Conference Agenda

https://vsf.tv/vidtrans26/

Full agenda PDF for VidTrans 2026 (Feb 24-26, Redondo Beach), sessions on MXL, RIST Group Update, VSF TR-06 hybrid delivery.

VidTrans Conference (VSF)

https://vidtrans.org/

Video Services Forum's annual media transport/IP conference, official site.

Voices of Video (NETINT) — video engineering podcast

https://voicesofvideo.netint.com/join-the-conversation

Live video-engineering podcast with deep hardware/silicon focus (VPU vs GPU/CPU, ASICs, codecs), hosted by Mark Donnigan and Jan Ozer.

Wowza Community

https://community.wowza.com/

The Wowza Community is a comprehensive forum for users of Wowza's streaming solutions, including Wowza Streaming Engine and Wowza Video. It offers sections for troubleshooting, developer discussions, and product announcements, making it a valuable resource for developers working with Wowza's tools.

Tags: Wowza, streaming, developer forum, video encoding, troubleshooting

Wowza Community Slack

https://www.wowza.com/slack

Community Slack group for live streaming developers and engineers hosted by Wowza.
